

CLAIMS

What is claimed is:

1. A hard coat film which comprises a substrate and a hard coat layer, wherein the hard coat layer is formed by applying on the substrate with a curable composition containing a photocurable substance and an oligomer type photopolymerization initiator and then curing by light irradiation to the applied curable composition.

2. The hard coat film as claimed in claim 1, wherein the oligomer type photopolymerization initiator is an oligomer type photopolymerization initiator represented by formula (1):

(1)

wherein Y is a linear or branched alkylene group, R¹ and R² are a linear or branched alkyl group, and n is an integer of 2 to 50.
